PROJECTS

Vartana — <https://www.vartana.com>

A payments platform to increase the buying power of businesses with flexible financing options.

OLX-mall — <https://www.olx.com.pk/mall/>

An ecommerce system based on Solidus. It enables the user to place orders and manage inventory both onsite and online.

As Senior Software engineer at EMPG I am responsible for designing and implementing the API's and modules, improving performance of the system, integrations, scaling, mentoring and continuously improving the user experience.

Accept Mission — <https://www.acceptmission.com/>

Accept Mission is an innovation management platform. Collect ideas from different sources, qualify and transform ideas into valuable projects. My responsibilities:

- Db design for new features
- Client management and communications
- Sprint coordination
- Implementing the API's
- Improving performance of the system,
- Integrations (i.e cognitive services - azure)
- Scaling

Expertise

ROR, Rails, Angular, Spree, Solidus, Web Services, Twilio, Git, Heroku, AWS, S3, EC2, Redis, Sidekiq, Mysql, Postgresql, JQuery

EDUCATION

PUCIT, Lahore — BS Software Engineering (2011 - 2015)

SKILLS

Well-versed in software tools including ROR(Ruby on Rails), Git, Web APIs, Angular, PgSql, JavaScript and JQuery, among others.

Confident problem-solving abilities to overcome glitches with creative solutions that are strategically designed to last long-term.

Good communication skills and the ability to listen carefully to gather requirements and feedback to determine modifications for optimal modules.

- *Improving the user experience*

Howmuch — howmuch.pk

A POS system based on Spree. It enables the user to place orders and manage inventory both onsite and online.

- *Enable to manage inventory, stores*
- *Enable to manage employees at different level and roles*
- *Enable to subscribe services and packages and their up gradations*
- *Provide Audit reports, Ledger, Customer reports, Vendor reports and Profit sale reports based on periods and filters*

My responsibilities/achievements:

- *Manage the migrations/upgradations*
 - . *Spree 3.7 to 4*
 - . *Rails 5.2 to 6.04*
 - . *Paperclip to Active record*
 - . *Paperclip data migration to Active record*

For data migration, set up a worker to store image paths to active storage tables, with the help of patches in active storage, so the functionality does not break anywhere in the system

Gift less ordinary: GLO — giftslessordinary.com

An e-commerce portal based on Spree and Angular. It enables the customer to customise the products.

The front end and Vendor admin panel is built on Angular while the backend was based on ROR and spree, my responsibilities are:

- *Designing the structure/architecture of the app (angular)*
- *Customisations on the Spree side*
- *Managing the client side App*
- *Implementing the feature and API's integrations*
- *Integration of review.io and contentful*

Yoda OCBC — yodang-link.herokuapp.com

An angular based site for OCBC bank with dummy apis integration.

Due to the security constraints, all of the input components are custom built and masked with custom html and css:

- *Portal has option of internationalisation*
- *Enable to maintain and create profiles of the customers*
- *Create and share plans for the customers*

myZindagi (Healthcare platform) — www.myzindagi.pk

A telemedicine app, that bridge between the qualified doctors and the underprivileged patients, also helped patients to stay away from quacks. Moreover enables patients to reach doctors via video call and forums.
