Summary

Highly skilled and results-driven Full Stack Software Engineer with expertise in React frontend development, Django and Flask backend frameworks, and building RESTful APIs.

Experienced in implementing robust and scalable solutions. Proficient in DevOps practices to ensure seamless deployment and continuous integration. Committed to delivering high-quality code and exceeding client expectations. Adept at collaborating with cross-functional teams to achieve project goals.

Experience

Full Stack Engineer

scalioo

Sep 2022 - Jan 2023 (5 months)

My responsibilities included:

Implementing DevOps practices to automate deployment processes, ensuring efficient continuous integration and delivery.

Conducting thorough testing and debugging to identify and resolve any issues or bugs, ensuring optimal performance and reliability of the applications.

Collaborating with cross-functional teams, including designers, product managers, and QA testers, to ensure successful project delivery and meet client expectations.

Adhering to industry best practices, coding standards, and security guidelines to deliver high-quality and secure software solutions.

Providing timely updates and progress reports to clients, effectively communicating project status, and milestones, and addressing any concerns.

Continuously staying updated with the latest technologies, trends, and best practices in Full Stack development to deliver cutting-edge solutions to clients.

DevOps Engineer

Upwork

Oct 2021 - May 2022 (8 months)

As a freelancer on Upwork, I provided comprehensive Full Stack Software Engineering services to clients, leveraging my expertise in React frontend development, Django and Flask backend frameworks, and RESTful API development. My responsibilities included:

Collaborating with clients to gather project requirements, understand business objectives, and translate them into technical specifications.

Designing and developing responsive and user-friendly frontend applications using React, ensuring a seamless and intuitive user experience.

Building and maintaining robust backend systems using Django and Flask frameworks, implementing efficient database models, APIs, and server-side logic.

Creating RESTful APIs to enable seamless communication between frontend and backend, ensuring smooth data transmission and integration.

Back End Developer

AITECHMA

Sep 2019 - Sep 2020 (1 year 1 month)

Built backend financial applications

Handled migrations to latest versions

Education

Multimedia University of Kenya

Electrical Telecommunications engineering , Electrical, Electronics and Communications Engineering

2014 - 2021

Yusudi Jijali

Certificate, Entrepreneurship/Entrepreneurial Studies

2018 - 2018

St. Joseph's Boys Highschool

High School

2009 - 2013

Moringa School

Software Development, PreP

Aug 2021 - Present

Microverse

Nano Degree, Computer Software Engineering

Oct 2022 - Oct 2023

Went through project-based intensive learning for over 1200 hours involving Data Structure, Software Design, Professional Development, Work Culture Development, and Communication.

Developed strong skills in remote work ethics and working with dynamic groups remotely.

The African Leadership University

Computer Software Engineering

Aug 2022 - Sep 2023

Licenses & Certifications

EF SET Certificate - EF Standard English Test (EF SET)

Troubleshooting Common PC Issues for Users - LinkedIn
