

# Kalkidan Betre

FULL STACK WEB DEVELOPER

## Profile

I'm a skilled full-stack developer with a focus on efficiency and problem-solving. I work well in teams and have a strong foundation in both front-end and back-end tech.

## Education

### Full Stack Software Engineering | Back-end, ALX

MAY 2022 – JUNE 2023

### BSc Computer Science, Unity University

OCTOBER 2018 – JULY 2023

## Employment History

### Freelance Software Developer

JANUARY 2022 – PRESENT

Provide software solutions to various clients involving both frontend and backend services. I have developed web applications using technologies such as ReactJS, Django, Spring Boot, and MySQL as well as utilized third-party services.

### Open Source Contributor

JULY 2023

I currently contribute to highlight.io, which is a monitoring tool for the next generation of developers.

## Projects

### Enterprise Issue Tracking and Management Web App

An issue tracking and management web app for service-based organizations to enhance their customers' satisfaction

### BeranaViz

A data structure and algorithm visualizer - <https://kalibetre.github.io/berana-viz/>

### CG Inventory Management

The CG Inventory Management system is a proprietary and comprehensive web application software designed to optimize the clients' assets management.

### Mochi Cards Exporter Obsidian Plugin

An Obsidian plugin that exports markdown notes to Mochi flashcards.
