CAREER PROFILE

An adept engineer who loves learning new things, data-driven research, and being able to tell people what to do based on data. I bring my fresh perspective as an AI enthusiast as well as my adaptability, resilience, and diligence as a career-changer. Strong focus on listening to and addressing client concerns and answering all questions in terms clients/audience can easily understand. Willingness to work with all team members and listen to their suggestions and input to improve results and maximize satisfaction. I love to combine my passion for learning and research with my IT skills for problem-solving and educating others.

CORE SKILLS

- Programming: Python, SQL
- Data visualization and analysis
- Networking and system security
- Information management
- Troubleshooting and problem-solving
- Technical writing and storytelling
- Statistics and Mathematics
- Communication and empathy

EDUCATION

- **MSc in Data Science and Artificial Intelligence** – in view (2024)

Edge Hill University, Ormskirk, United Kingdom

- **B.Eng Mechanical Engineering** – August 2014

University of Nigeria, Nsukka

WORK HISTORY

IT Support
Suburban Fiber Company, June 2023 – till date
- Troubleshooting and resolving client network.
- Core provisioning and core splicing.
- Reporting writing and documentation.
