Self-employed / Junior Web Developer
March 2020 - PRESENT,
MERN stack developer

Frontend development using HTML, CSS, Bootstrap, and ReactJS. Backend development using Javascript. REST API using ExpressJS.

Database system using MongoDB and Mongoose. Server configuration with puppet and Web hosting using Nginx web server.

Self-employed / Computer Maintenance
Aug 2018 - 2021, Adama, Ethiopia

I had been giving door-to-door computer maintenance services to clients. I was making solutions for both software and hardware issues.

Self-employed / Graphics Designer

Graphics designing using illustrator. I use illustrator for Website mockups. I also use it for android and desktop app UI designing and to design logos.

Education

ALX Africa / Software Engineering Programme
Feb 2022 - Feb 2023, Online Class

The 12-month ALX Software Engineering Program prepared me with the technical and work-ready skills for a global career as a Full-Stack Developer.

Adama Science And Technology University / Computer Science And Engineering (CSE)
July 2020 - July 2025, Adama, Ethiopia

It is a 5-years engineering degree program in that I acquired knowledge of programming, algorithms and data structures, computer architecture, operating systems, computer networks, algorithms design, circuit analysis and electronics, digital logic and processor design, computer graphics, software engineering, database systems, digital signal processing.
