Summary

I am recently certified as Full Stack Software Engineer by the ALX-Africa School of Engineering in partnership with the Holberton Institute of Computer Science. I want to develop my experience with branches like DevOps and technologies like blockchain.

Likewise, I am listening to any internship offer or junior developer position (remote or hybrid). Also, I am open to any relocation needs.

As I need to become a better Engineer, I am more attuned to an associate position where I can learn from my mentor and, at the same time, participate in improving the team.

Experience

Student Software Engineer

alx_africa

May 2022 - Present (1 year 1 month)

The African Leadership X Accelerator is an African Leadership Group subsidiary company, in its mission of technologies growth in Africa has designed a Software Engineering curriculum that lasts 12 months. The curriculum is divided into two different parts: 9 months of Foundations course and 3 months of short specialization.

Software Engineer

Upwork

Jan 2022 - Present (1 year 5 months)

As freelance software engineers, it is up to us to apply for a fixed-term job or an hourly contract:

Which implies :

— competitiveness
— the desire to do well
— The speed of delivery
— Expertise

Brand Ambassador

MTN

Jun 2017 - Sep 2017 (4 months)

As Ambassadors of the MTN Mobile Money brand, it was a question for us to popularize the mobile money system in Cameroon by approaching potential customers for:

— Create new Mobile Money accounts
— Update suspended accounts
— Interest customers to use it to have a mobile money account
